## Professional Profile

---

Before studying Industrial Design at RIT, I served in the US Navy as an Interior Communications Electrician working on the flight deck aboard the aircraft carrier USS Harry S. Truman. I find the most enjoyable and exciting parts of being an industrial designer are the group dynamics, discussing solutions with a team, and hands-on prototyping.

---

## Experience

---

### Cabot Group / Maintenance Technician

Winding Creek Apartments & Townhomes  
1017 Waverton Circle, Webster, NY 14580  
Summer 2021

As an apartment complex maintenance technician, I was tasked with servicing and the maintenance of household appliances and utilities as well as repairs for apartment turnovers.

### US Navy/ Interior Communications Electrician

USS Harry S. Truman / Honorable Discharge  
2013 - 2017

My role as an IC Electrician on board an aircraft carrier was to interpret and analyze the ship's blueprints, inspect, test, analyze, and make detailed casualty analyses. In addition, I used technical manuals, schematics, and circuit diagnostics to direct the repair of electrical, electronic, fiber optic, hydraulic, mechanical, and synchro, and servo systems.

---

## Education

---

### Rochester Institute of Technology / Bachelor of Fine Arts

One Lomb Memorial Drive  
Rochester, NY 14623  
Completion, August 2023

Major - Industrial Design    Minor - Communications

---
